

Leak-Proof Joints

- Wide range of types and sizes
- Rugged and durable
- Suitable for use under extreme conditions of pressure and temperature
- Ideal for most general industrial applications

Technical Data

Medium:

Compressed air, water, oil, gas.

Operating Pressure:

The maximum working pressure is limited by the type of tubing being used.

Tube Sizes:

4mm to 22mm O/D, 3/10" to 3/4" O/D.

Tubing:

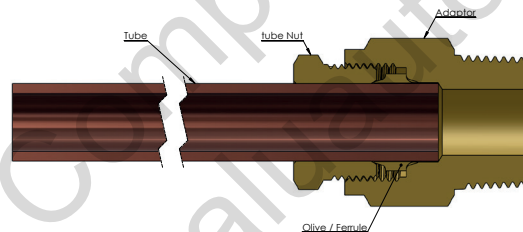

Nylon, Poly, Copper annealed and half-hard steel tube.

Materials:

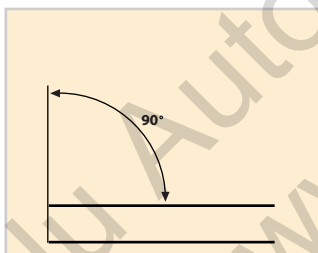

Brass to BS 2874: 1986 (CZ121) for tubing nut, sleeve and body manufactured from bar, brass to BS 2872: 1969 (CZ122) for body manufactured from stamping.

A wide range of materials can be machined including: **carbon steel, alloy steels, stainless steel, brass, aluminium, forged and cast steel**

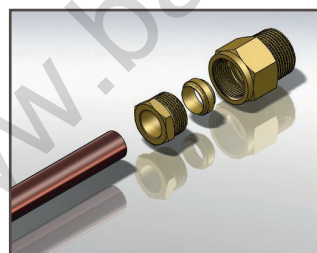

Assembly Details

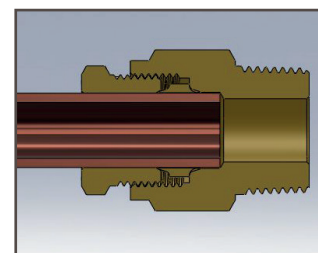

Method of Assembly

1. Ensure that the tube is cut square and is free from burr.

2. Place the tubing nut and sleeve on the tube and push the tube into the fitting until it bottoms.

Holding the tube firmly in contact with the tube stop screw the tubing nut down finger tight. Then tighten further 1-1 3/4" full turn for a leak proof joint.

The method of preparation and assembly described will ensure leak-proof joints over a wide pressure range, depending upon the size and type of tubing used. Over-tightening at any joint, will only lead to damage of the fittings or an unsatisfactory seal.

Part Number	Diameter K (mm)	Diameter M (mm)	Length (mm)
BBS-49	12.30	9.00	18.00
BBS-50	14.30	11.40	19.30
BBS-51	16.00	11.50	22.60
BBS-52	17.50	11.60	23.40
BBS-53	23.30	19.00	25.60
BBS-54	35.00	19.40	29.50

Design | Manufacture | Distribution

Turned components to meet your needs

Drawing specific

Material: brass, steel, stainless, aluminium, plastic, nylon and many more

Heat treatment

Plating: zinc, nickel, chrome, chemical black, anodizing and many more

ISO/TS 16949 approved manufacturing facility
